DYNASTY OF LEGENDS

6/1/2021

Dynasty of Legends

NFT 2D card game set in the context of the Three Kingdoms

DYNASTY OF LEGENDS
- OVERVIEW

Dynasty of Legends

Dynasty of Legends is a 2D card game set in the heroic and passionate "Three Kingdoms Age" epic, with an NFT system that allows players to earn tokens during experience and combat in-game.

The gameplay is familiar but not less interesting. Players can collect legendary heroes from "Three Kingdoms Age" to form a great team and join in fiery battles. Besides that, we have many features, such as level up items, arrays, magic treasures, etc., that create depth for the game and strategy elements for players.

The most important difference between **Dynasty of Legends** and other traditional card games is the blockchain technology and with it, the "play for earn" trend. Now we can explore the magical world of Dynasty of Legends with other players and earn money while you enjoy it.

Three ways to earn money in Dynasty of Legends:

- Join in ferocious PvP battles for archiving rewards.
- Recruit and train your heroes, as well as trade with other players.
- Experiment with in-game features.

Dynasty of Legends was created with the purpose of becoming a playground for players who are attracted to the card genre and Three Kingdoms Age context to keep up with the NFT blockchain system that allows players to play and earn at the same time, to avoid wasting time.

More than that, we always believe this interesting game is a great gift for players who love this game type.

Play system

All combat takes place completely automatically, and players do not need to be manual like in other traditional games. Just create your favorite team and watch them burn the heroes

FREE PLAYERS

With the new blockchain trend, all players need not pay but can earn income from the Dynasty of Legends, an economy built on players' joining the game instead of forcing players to deposit coins continuously.

In the process of players strengthening and collecting equipment and costumes, players will help increase the value of NFT products in Dynasty of Legends. With the time and dedication players put in, what players have created and developed can be exchanged in the marketplace for a fair price.

Players can sell their heroes to other players or continue to invest for a long time, and the product will also increase in value depending on market demand as well as its strength and features.

PAID PLAYERS

Free-to-play players who do not have the time or want to speed up their progression in the game while also increasing the value of their hero can spend money shopping to go straight into the monetization phase of the game's economy chain. Paying players will have an advantage over other players depending on outstanding features. This trading process is the gateway between free and paid players in the game's economy system.

Hero Character

Built on the image of legendary heroes of the Three Kingdoms period with their full personality, characteristics and strength.

THUC

- Lord – Liu Bei
- Mentor - Zhuge Liang, Xu Thu, Pang Thong

Five Tigers Generals

- Guan Vu
- Zhang Fei
- Zhao Yun
- Ma Chao
- Huang Zhong

- Xiahou Yuan

NGO

- Lord - Sun Ce, Sun Quan
- Mentor – Zhou Yu, Lu Su, Lu Xun

Brave General

- Huang Gai
- Gan Ning
- Lu Meng
- Ling Tong
- Taishi Ci

DOL Token

Dynasty of Legends (DOL) is a unit of tokens used in the game Dynasty of Legends, belonging to the BEP-20 token. Holders of DOL tokens have certain rights in the game. In addition, players can earn DOL tokens by participating in different features and by following and subscribing to content created by other players.

The purpose of the DOL token is to provide motivation and inspiration for both players and developers. The above techniques have two main purposes: increasing the incentive for players to interact with DOL tokens and encouraging players to save tokens to receive benefits. To balance ownership and control of DOL tokens. We wanted to make Dynasty of Legends the first game to be completely owned and controlled by the player. This opens up endless possibilities, but needs to be done with great carefully. In the history of the game, there have been many times when player interests have collapsed under the name of "anti-centralization". The transition to a completely decentralized organization will take a long time. Community funds will be operational in early 2022. Community funds will be provided by the game Dynasty of Legends and a portion of the rewards will be given. Once the system has been properly decentralised the fund will be managed by DOL token holders.

Transaction

Dynasty of Legends has an **NFT trading system** in-game where players can increase their power and grow the game economy by **trading NFT products**. All transactions will be paid with a 15% transaction tax.

The exchange will use tokens as the currency, and players can set the price of their NFT products as they like. Keep an eye on the market prices and look for profitable deals!

Token Information

We will explain the economic system of the DOL token, break down the total reserves, and the role of the DOL token in anti-centralizing the management system and supporting the game economy.

[Token image]

DOL is the base currency of Dynasty of Legends. Players use DOL to level up characters, join in battles, develop strength, and build teams by buying and selling on the Dynasty of Legends trading market. The maximum reserve of DOL tokens is 100,000,000,000.

Contract address: xxxxx

Name: Dynasty of Legends
2

Development Plan

Please note that game development is ongoing and all projected dates are subject to change. All delays, if incurred, will be communicated to the community as soon as possible.

- **Period 1 - The Start**

- Testnet Launch.
- Smart Contracts (BEP721, BEP1155) NFT Marketplace.
- Game Demo - Dynasty of Legends - BETA Release + Testnet
- Community Moderation.
- Token Generation Event.
- Token Private Sale (22/01/2022 - 28/02/2022).
- IDO (PancakeSwap) - (Mar 5 2022).
- Public Security Audit: Techrate, Solidity Finance, Certik.
- Beta NFT Marketplace released.
- Dynasty of Legends - Official Release + Mainnet (20th Feb 2022).
- NFT Marketplace release. (10th Mar 2022).
- Burning Token Event for the first time. (15th Mar 2022).

- **Period 2 - The Growth**

- CEX Listing: Cointiger 30th April 2022.
- CEX Listing: MXC 15th May 2022.
- Partnerships with Game Studios to add more games.
- Game Client + Analytics.

- **Period 3 - The Singularity.**

- Metawar goal is to become the central point for all things gaming. Be a part of the revolutio.

DOL Token Maintenance Plan

The Platform of Dynasty of Legends

Dynasty of Legends is an entertaining game that allows the player to earn an income through the time and effort put into the game and the development of the economic system.

- Dynasty of Legends' economic system is completely player-determined and based on real money. Instead of trading good in-game products or selling games, the manufacturer has made an effort to provide players with an extremely large economy. The transaction fee will be put into the Community Fund, and the use of this fund will be decided by the DOL token holder. Producers earn income by holding DOL tokens. Players produce DOL tokens with in-game resources and sell them to other players. It has the appearance of a country with its own commercial economy. The DOL token is held by the government, and the government collects a transaction tax. The creator of this game holds 10% of the total DOL tokens.
- In-game products and resources are converted into tokens that can be freely traded with other players worldwide.

Economic importance

The economy will be maintained in the long term by the plans that the team has advanced as follows.

- Give the DOL token a useful purpose.

By that time, new and exciting features like lands, mini-games, and combat upgrades will have been added. Besides this contributing to the creation of new metas for the game, extra features outside of combat will provide value to DOL. Players always have new goals to achieve in Dynasty of Legends. Finally, demand for DOLs will be boosted by the value they bring to players in the competitive, social, and hedonistic types of play.

- Growth in DOL value

Currently, the main way to increase power is to collect more heroes and use the various stratagems. This is not a long-term increase. Later, there will be more hero enhancement features, stronghold lands, and many other features that require crafting resources. The player can then send out heroes to gather resources or seek out these upgrades. This will create a lasting supply for Dynasty of Legends players.

Additional Source of Income

There will be several opportunities to add additional income to the economy as a reward for player trading activities.

- Strategic and promotional partners

Many projects have shown their interest in providing rewards and tokens in the Dynasty of Legends economic system. So far, XXX, YYY, and ZZZ have all participated in the token experiment for Dynasty of Legends. Dynasty of Legends has entered the ranks of the most knowledgeable community about how to use Blockchain technology in the world.

- NFT Trading

Trade items will exist in both physical and digital forms. This is a common request from players who want to get digital items to show their passion for the game. Trade items may also include genuine NFT graphics, T-shirts, and stuffed animals. Profits earned will be reinvested in the game and will return to the player's valet.

IDO PRE-SALES INFORMATION

Pre-sales

• Token count: 30,000,000,000 DOL–30% of total reserve
• The soft limit: 500 BNB.
• The hard limit: 1200 BNB
• Account maximum = 20 BNB
• The IDO rate: 0.0000004BNB/DOL.
• Pancakeswap rate: 0.0000004BNB/DOL
•

IDO: Begins January 22, 2022 and ends Feb 28, 2022.

IDO 1

• Token quantity: 5,000,000,000 DOL – 10% of total reserve
• Soft cap: 100 BNB
• The hard limit: 400 BNB.
• Account maximum = 20 BNB
• The IDO rate: 0.00000004BNB/DOL.
• Pancakeswap rate: 0.0000004BNB/DOL
•

IDO Round 1: Begins on January 22, 2022 and ends on January 31, 2022.

IDO 2

• Token count: 10,000,000,000 DOL – 20% of total reserve
• The soft limit: 400 BNB.
• The hard limit: 800 BNB.
• Account maximum = 20 BNB
• The IDO rate: 0.000000045BNB/DOL.
• Pancakeswap rate: 0.0000004BNB/DOL
•

Round 2: Begin on Feb 1, 2022 and ends on Feb 10, 2021.

IDO 3

- Token count: 15,000,000,000 DOL – 20% of total reserve
- The soft limit: 400 BNB.
- The hard limit: 800 BNB.
- Account maximum = 20 BNB
- The IDO rate: 0.00000005BNB/DOL.
- Pancakeswap rate: 0.0000004BNB/DOL
-

Round 3: Begin on Feb 11, 2022 and ends on Feb 20, 2021.

IDO 4

- Token count: 20,000,000,000 DOL – 20% of total reserve
- The soft limit: 400 BNB.
- The hard limit: 800 BNB.
- Account maximum = 20 BNB
- The IDO rate: 0.00000006BNB/DOL.
- Pancakeswap rate: 0.0000004BNB/DOL
-

Round 4: Begin on Feb 21, 2022 and ends on Feb 28, 2021.

Mode of Operation:

How to buy?

Step 1: Access the IDO Link

Step 2: Connect to your wallet

Step 3: Enter the amount of BNB you'd like to use to purchase DOL.

Step 2: Click "Buy" and confirm the trading

BUY WITH METAMASK

To connect with Metamask Dynasty of Legends. Let follow these steps:

Android & iOS

- Open Metamask and tap the upper left corner icon

- **Select in Settings**

- **Select Network**

- Tap the Add Network button at the bottom

- Fill in the blanks on the next page with this information.

Network Name: Binance Smart Chain

RPC Url: https://bsc-dataseed.binance.org

Chain ID: 56

Symbol: BNB

Block Explorer URL: http://bscscan.com

- After confirming, return to the first interface and select **Browser.**

- Enter xxxx in the search field and begin searching. The first result is the official page. Tap to enter.
- Your wallet will ask to connect. Tap Connect with Dynasty of Legends, then you can buy DOL tokens.
